thanks, Kate. Jon Kaminsky was at the meeting and actually sat at the table with the working group members, which was a first. John Corra also asked him directly to be part of the wellbore integrity work group and he agreed.

Don:

Martin Hestmark, our senior management lead on Pavillion, just called me to say that John Corra had contacted him to ask that we do everything we can to have someone from BLM attend the meeting today (1:00 pm) in Casper (details attached). Apparently, our staff, as well as WDEQ staff, have tried to engage Mr. Kaminsky on this and he has not responded. While I am not directly involved in this, my understanding is that this is an important next step toward resolving this matter and it would be really helpful if BLM could be there. Anything you can do to facilitate this would be very much appreciated.

Thanks and let's get lunch very soon!

Kate

Subject: Pavillion Working Group Agenda

Here is an agenda for our meeting next Tuesday. If you have comments, or wish to add anything let me and Bob king know.

Location: OGCC meeting Room, Casper Wyoming

Time and Date: 1 PM to 4 PM on July 24, 2011

Agenda:

Pits Team Report and Discussion (Lead-Tom Kropatch)

Status of project

Identify gaps and remaining work to be done

Outline next steps.

Public comment

Well Bore Integrity Team report and Discussion (Lead - Gary Strong)

Status of project

Identify gaps and remaining work to be done

Outline next steps

Public comment

Briefing on status of the cistern project (Lead- John Corra and Jeremiah Rieman)

Briefing on status of recent deep monitor well sampling (John Corra and EPA)

Open Discussion

Notes:

1. It has been a long time since our last meeting, so we expect that some time may be needed to review past efforts, etc. While not on the agenda, please feel free to ask questions and share insights about where we have been, etc.
2. EPA, DEQ and OGCC staff have given some thought to these matters, and attached to this email are some draft documents that represent that thinking. Please review these ahead of the meeting and come prepared to talk about them. While Gary's charts are a summary of pressure testing to date, the other two docs are from DEQ and EPA and are intended to be 'straw models' of potential ways to describe the work remaining and a path forward. We can use these as a guide to generate our next steps and focus our future efforts.
